## PANAMA CANAL EMERGENCY DAMS

**G**ATUN LAKE, eighty-five feet above sea level, is the reservoir holding the water to feed the Gatun Locks (which lead to the Atlantic) and the Miraflores and Pedro Miguel locks on the Pacific end of the canal.

Every ship going through the canal in either direction uses the water from Gatun Lake to lift it from the one ocean and lower it into the other. Should some accident destroy a lock, the weight of the water released might force down the others and cause tremendous damage and, by lowering the level of the lake, make the canal inoperative until rain had refilled the lake.

Therefore these big emergency dams were constructed. Normally they are not used. In emergencies they would be swung over the locks, the gates would drop into position and effectually dam the opening.

Otis engineers designed, constructed and installed the machinery for operating six of these gigantic dams. It is a feat typical of the world-wide scope of Otis activities in engineering and the vertical transportation of men and materials.

*Most of the famous buildings of the world  
are equipped with Otis Elevators.*

## *Mining for King Solomon's Temple*

Eighty thousand workmen with the quarrying tools of antiquity toiled in the subterranean quarries from which King Solomon obtained the pure white stone for his Temple—begun in 983 B. C.

Channels, to mark the dimensions of the blocks, were grooved in the rock wall with picks, crudely fashioned of bronze. The Egyptian method of breaking out the rock was used: into a niche cut in the stone, a dry wooden wedge was pounded and water poured in upon it. The swelling of the wood forced out the block.

The rough and smooth ashlar of which the temple was built was worked down to the desired size in these caverns. Seven

years were consumed in building the temple.

At a modern copper mine, 47,000 tons of ore have been produced in one day with the aid of Hercules Explosives. And more than 25 million pounds of Hercules dynamite have been used at this mine without a single accident due to the explosives.

King Solomon's craftsmen labored for many days to accomplish as much as one pound of Hercules dynamite will now do for you in a moment.

Write to our Advertising Department,  
King Street, Wilmington, Delaware,  
for a book on Hercules Products.
